

# REQUEST FOR APPLICATIONS

## MDxPX

## NYP Patient Experience Provider Innovation Grants 2021

Providing a great patient experience (PX) is a cornerstone of NewYork-Presbyterian's commitment to delivering high-quality care. MDxPX is a **provider innovation grants program** supporting projects led by providers that aim to improve PX through creative ideas and processes. After a successful inaugural year with projects being developed by physicians at Brooklyn Methodist Hospital, Lower Manhattan Hospital, and Morgan Stanley's Children's Hospital, the MDxPX program is excited to kick off its second year. MDxPX will support up to four projects, each with an unrestricted grant of up to \$10,000. Grant recipients will also receive project guidance and data support from the NYP PX team. Additional in-kind support will be considered on a case-by-case basis.

**Request for Applications:** The MDxPX team is soliciting proposals for novel projects to be developed and led by NYP-affiliated faculty/staff physicians, Advanced Practice Providers (PA/NP), or trainees/students partnering with a faculty member. Projects may aim to improve any aspect of PX but should be **centered on provider activities**; our current projects, for example, are focused on provider-patient communication during bedside rounds and during critical conversations, and communication around discharge. Areas of particular interest for this cycle include:

- Provider-patient bedside communication
- Communication about medications (in particular about side effects)
- Increasing provider engagement in patient experience
- Various provider-centered HCAHPS domains

### Ideal MDxPX projects will be:

- Centered on **provider activities** (required)
- Sustainable, scalable, and timely
- Contribute to Patient Experience research

### Eligibility Criteria:

- **Any NYP-affiliated faculty/staff physician** or **Advanced Practice Provider** (PA/NP) may apply
- **House staff** and **medical students** may function as *co-leaders* with a faculty physician
- **Interdisciplinary projects / teams** incl. nurses, trainees, pharmacy, PT/OT, nutrition, etc. are welcome
- **Any setting** – inpatient, ambulatory, ED, etc.
- Anticipated completion in **12 months** (extra time permitted for manuscript submission process)

**Application Process:** The application process has two phases: In the initial phase you are asked to submit a CV and a brief synopsis ("elevator pitch") of your project. The projects most closely aligned with the priorities described above will be invited to participate in the second phase, which involves submission of an in-depth written proposal (charter).

**Questions?** Please email Paul Martin at [pam9126@med.cornell.edu](mailto:pam9126@med.cornell.edu)

**Due date for initial brief application: March 31, 2021**
